

## Experiment No. 3.3

**Student Name: Lucky**

**Branch: MCA**

**Semester: I**

**Subject Name: Front-end Web UI**

**UID: 22MCA20083**

**Section/Group: MCA-2/ Grp A**

**Date of Performance: 04<sup>th</sup> Jan 23**

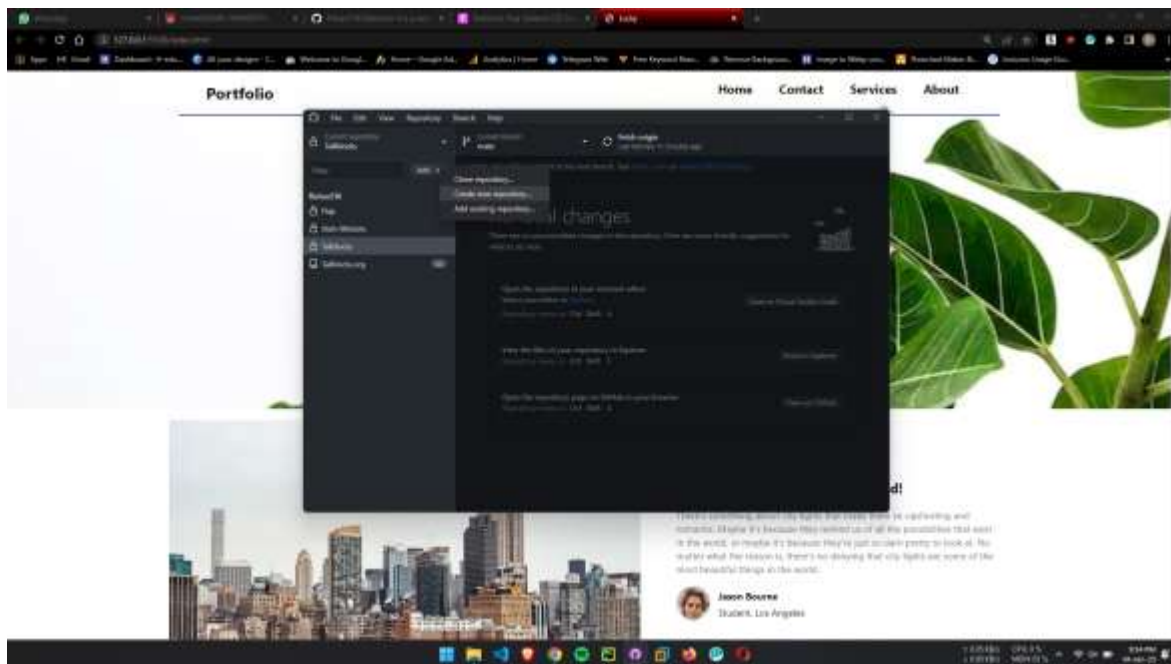

**Subject Code: 22CAP-606**

### 1. Aim/Overview of the practical:

**How to host your webpage on the GitHub**

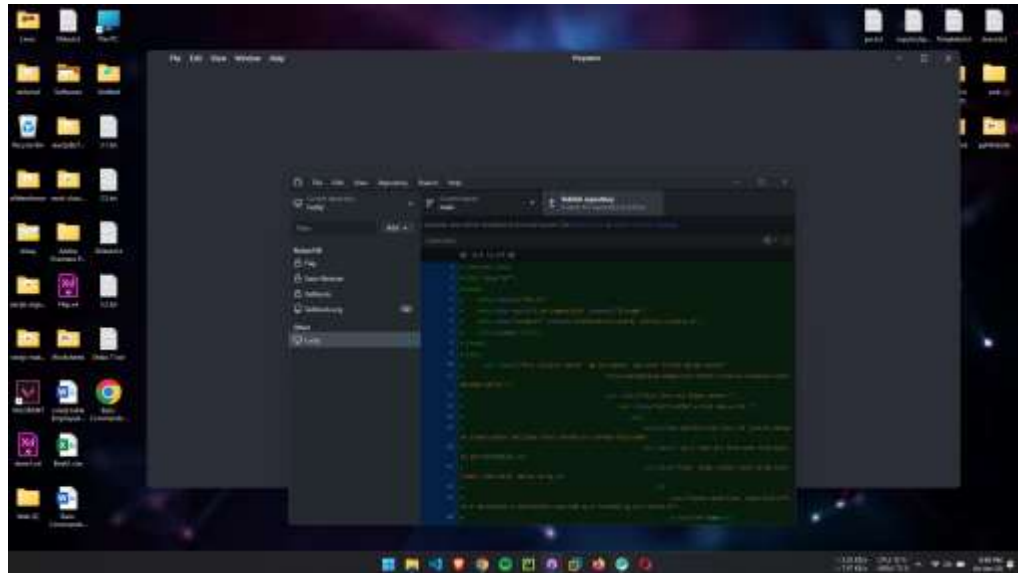

### 2. Code for experiment/practical:

- Create a new folder and create an index.html file .
- Create a webpage in that file.
- Open Github and click on create a new repository.

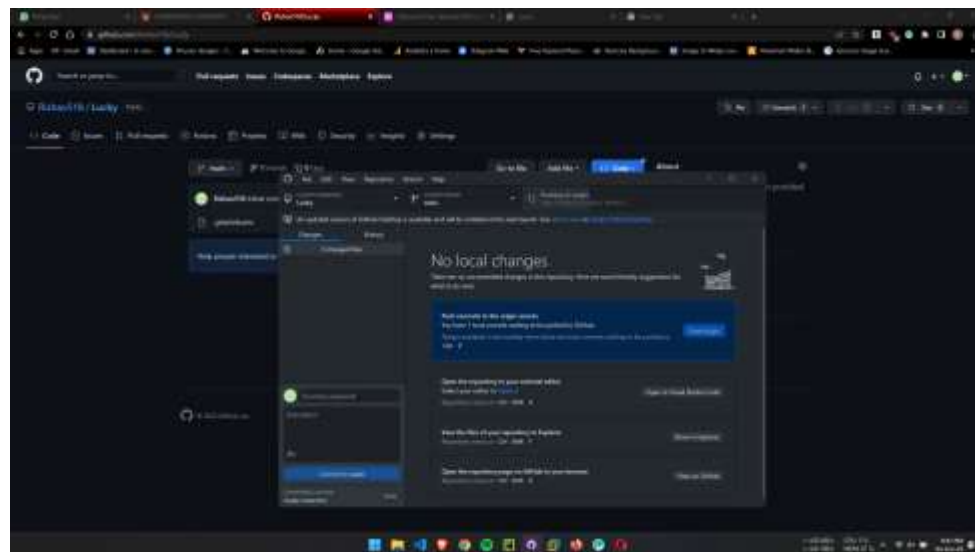

- Choose the path and move your file in that.

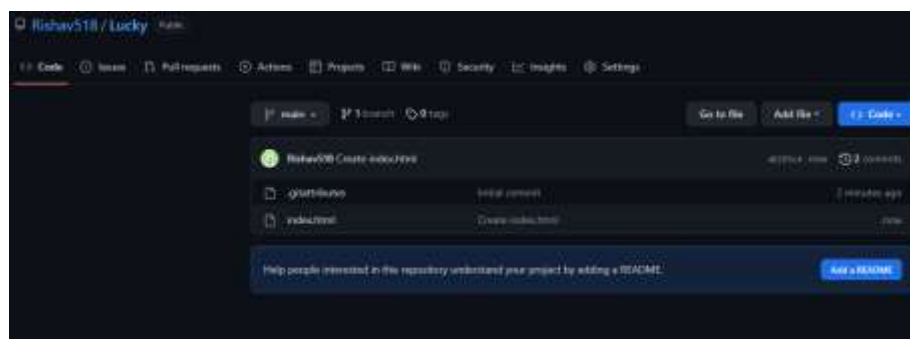

Open file in vs code and go to git tab in left bar.

- Enter “Initial Commit” in it.
- Click on Push Origin to publish your repository on Github.

- Repository will be uploaded on github.
